ONE**

An approachable, entry-level prime label press offered at an unprecedented investment level

**DIGITAL  
PLUS**

Add digital capability to optimize existing equipment, enhancing flexibility and application range

**MA** MARK ANDY

**DIGITAL PLUS**

## Add Digital Capability to Optimize Flexo

The Digital Plus program allows you to enhance your pressroom with the benefits of digital without investing in a new press. With multiple adaptations, the Mark Andy Digital Plus enhancement program offers technologies that retrofit to existing press models with ease. Our Digital Plus program is ever-expanding and we are excited to be showcasing our inaugural product at this time.

**DIGITAL +3600**

# DIGITAL +3600

## More than a retrofit: A full digital workflow.

Add digital capability to your flexo press with a fully integrated high-speed, high-resolution digital printing enhancement. A simple, self-contained digital engine powered by Colordyne Technologies that aligns automatically to existing flexo registry, Digital +3600 expands your capabilities with variable data, barcodes, supplemental text, and more.

- CMYK inkjet print module
